

# Post Deductible Limited Purpose FSA

The **Limited Purpose Health Flexible Spending Account (LPF)** allows employees the additional benefit of qualifying to participate in a tax advantaged flexible spending account while also being able to fund their individual Health Savings Account (HSA). Find Current Contribution Limits Here: <https://www.amben.com/participants/annual-irs-benefit-limits/>

When an employer introduces a high deductible Health Plan (HDHP) with a Health Savings Account (HSA), they are providing their employees a vehicle to accumulate funds on a tax favored basis, in an individual Health Savings Account, these savings can then be used to pay for qualifying medical expenses. Funds deposited in an HSA are not subject to the use-or-lose rule which could cause forfeitures at the end of a plan year.

The one restriction on making tax advantaged contributions to an HSA is that the employee cannot have any other “first dollar” medical coverage available (other than coverage for vision and dental expenses), because such coverage could be used to cover the minimum out-of-pocket deductible expenses stipulated by the IRS (see chart below). Funds in a general purpose FSA are counted as “first dollar” coverage and therefore an employee

who is enrolled (or whose spouse is enrolled) in a general purpose FSA would be precluded from making contributions to their HSA during the period they have active coverage in a general purpose FSA. This is where the LPF comes into play.

The LPF is designed to be compatible with the employee’s Health Saving’s Account. Because the LPF limits reimbursements to vision and dental expenses, employees can maximize the benefits in their HSA by allowing funds to accumulate towards deductible expenses, while using separate pre-tax dollars in their LPF to pay for their out-of-pocket vision and dental expenses.

If an employer allows it under their LPF plan design, employees who anticipate having large deductible expenses can use their LPF as a “Post Deductible FSA” once they have met the minimum out-of-pocket deductible expense as required by the IRS (see your organization’s benefits administrator for details). This means that employees can be reimbursed for any general purpose medical expenses that were incurred after the date that the employee met the minimum out-of-pocket deductible expense required by the IRS.

## HSA Limits

HSA holders can choose to save up to the IRS limits. HSA holders 55 and older get to save an extra \$1,000. All of these contributions are 100% tax deductible from gross income. Minimum annual deductibles follow the IRS annual Minimum limits, and annual out-of-pocket expenses (deductibles, copayments, and other amounts, but not premiums) cannot exceed the IRS annual Maximum limits. Find Current Contribution Limits Here: <https://www.amben.com/participants/annual-irs-benefit-limits/>

### **Can I still deduct healthcare expenses on my tax return?**

Yes, but not the same expenses for which you have already been reimbursed from your FSA.

### **Are over-the-counter (OTC) medications**

Yes. The CARES Act reinstated OTC medications as eligible, without a Prescription, as well as Menstrual Care products, retroactive to 1/1/2020.

### **What is a Letter of Medical Necessity?**

The IRS mandates that eligible expenses be primarily for the diagnosis, treatment or prevention of disease or for treatment of conditions affecting any functional part of the body. For example, vitamins are not typically covered because they are used for general wellness, but your doctor may prescribe a vitamin to treat your medical condition. The vitamin would then be eligible if your doctor verified the necessity in treatment.
